Assassin's Creed

Assassin's Creed is one of the most important videogames in the last years. It is a series of several videogames. It is pronounced /asásins criiid/.

The graphics and the action are impressive, and the story is very good too. A videogame player usually enjoys this.

The protagonist's name is Desmond Miles (pronounced /désmond máils/). He is part of a secret organization of killers. Thanks to a machine, he can travel to the past. There, he lives the lives of his ancestors again. His ancestors were murderers too. So, the player controls Desmond Miles and, at the same time, the player controls Desmond's ancestors, like Altaïr, who lived in the Middle Ages. Or Ezio Auditore, who lived in the Renaissance. Or Connor, who lived two-hundred years ago.

The player controls characters that can use weapons of all types. These characters can move around the stage doing “parkour” /parkúr/. This consists in avoiding obstacles fast and beautifully. The word “parkour” comes from French.

Desmond's enemies are the templars: a military order that existed in reality during the Middle Ages. The game is fiction, but it includes things from the reality too. The cities in the game are real too, and they are very well copied.

The game is classified for people over eighteen, following the PEGI (Pan European Game Information) /pan iuropían guéim informéishon/, which means “Information about the game all over Europe”.

Questions:

1. Who are Desmond's enemies?
2. How can Desmond travel to the past?
3. What is “parkour”?
4. When did Altaïr live?
5. Which type of videogames do you like?
