My weird pet

Name: Cranky

Species: Rooster Dog

Type: mammal fish amphibian reptile bird arthropode

Weight: 42 kilos

Height: 75 centimetres

Color: Red, black and white

Number of legs: Four

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Corn and dog food

By: Pepe Morales

My weird pet

Name: Wiggy

Species: Parrot Dog

Type: mammal fish amphibian reptile bird arthropode

Weight: 48 kilos

Height: 80 centimetres

Color: Black and white

Number of legs: Four

Features: fur feathers scales skin bill/beak horns
 tusks spots stripes tentacles shell legs
 gills lungs tail wings fins fangs mane

It feeds on: Nuts, worms and dog food

By: Laura García

My weird pet

Name: Thuggy

Species: Parrot Panda Bear

Type: mammal fish amphibian reptile bird arthropode

Weight: 176 kilos

Height: 2.25 metres

Color: Black and white

Number of legs: Four

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Honey, bees and nuts

By: Luis Fernández

My weird pet

Name: Smoothie

Species: Sparrow Horse

Type: mammal fish amphibian reptile bird arthropode

Weight: 55 grams

Height: 6 centimetres

Color: Brown and white

Number of legs: Two

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Grass, polen and insects

By: María González

My weird pet

Name: Punchy

Species: Duck Croc

Type: mammal fish amphibian reptile bird arthropode

Weight: 6 kilos

Height: 42 centimetres

Color: Black and brown

Number of legs: Two

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Small preys

By: Rocío Gutiérrez

My weird pet

Name: Bestie

Species: Sparrow Dog

Type: mammal fish amphibian reptile bird arthropode

Weight: 30 grams

Height: 7.4 centimetres

Color: Brown and white

Number of legs: Two

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Insects and dog food

By: Gervasio Martínez

My weird pet

Name: Lightning

Species: Eagle Mare

Type: mammal fish amphibian reptile bird arthropode

Weight: 137 kilos

Height: 1.88 metres

Color: White

Number of legs: Four

Features: fur feathers scales skin bill/beak horns

tusks spots stripes tentacles shell legs

gills lungs tail wings fins fangs mane

It feeds on: Grass, fish and snakes

By: Pedro Vélez
